

Welcome to **B&C Industrial Products, Inc.** We are a second-generation, family-owned destination for a vast customer base seeking solutions for casters as well

as storage, safety, and material handling products. Our humble beginnings date back to 1998, when founders Bob and Carol Hansen worked out of their home and shed maintaining an inventory of casters, and focusing on a high level of customer service and satisfaction.

In 2000, they welcomed their son Brian into the company after he had gained valuable experience outside the family business as a branch manager in the power transmission industry. The business quickly grew and moved from their home to a new office/warehouse space in 2001. In 2007, Brian purchased the company and added additional team members. Following several years of steady growth, we moved to our current 20,000 square foot facility in Garrett, Indiana, in 2012.

Today, we inventory assembled casters and caster components, pallet racking, pallet jacks, stackers and other material handling products, in excess of one million dollars. With products in stock and an incredible online catalog offering, we are positioned to serve any operation across the nation. We're also recognized by premier manufacturers for service excellence with awards like Vestil Manufacturing's Top Performer and Adrian's Safety Solutions Material Handling Dealer of the Year.

No matter how large or small your operation is, we are going to take great pride in serving your needs. Our company began out of our family home and our continued customer care is the reason why we were able to grow.

# CASTERS

**B&C Industrial** is both a manufacturer and a distributor of quality casters. Our knowledgeable staff of experts, along with our extensive component inventory of yokes, wheels, bearings, and accessories, allows us to offer our customers the right product for virtually any application. We are also a Tier 1 Distributor with relationships with the most reliable manufacturers.

Our goal is, and has always been, to provide the best personal service and the best Caster solutions for your specific applications to each of our valued customers.

# MATERIAL HANDLING SOLUTIONS

Our reputation for excellence was established for carrying quality casters and quickly turning around orders. With that specific niche, we grew our offerings as the demands of our customers grew. They appreciated our customer-centric attitude and looked to us to provide more products with the same great service. Today **B&C Industrial Products, Inc.** is a trusted source for countless Material handling products and solutions.

The material handling products market is vast and competitive, that's why **B&C Industrial Products Inc.** will continue to grow, focused on the same great service that built our company to gain your trust and keep you as a lifelong customer.

- Material Handling Products
- Modular Enclosure Systems

## Cantilever Rack Systems

Structural Steel Cantilever Storage Systems are multi-level, high density storage racks designed to handle hundreds of different types and sizes of products with freedom from Upright interference. This allows for easier product removal and replacement. Cantilever Storage Systems are ideally suited to the storage of lumber, PVC pipe, conduit, bar & plate stock; virtually any material which is inventoried in varying dimensions and requires long and unobstructed space.
