Catalog No. CC115

Ashland Conveyor Products has been producing quality conveyors for over 45 years. ACP was established in 1968 as MTD Conveyors in Indianola, MS. The current ownership purchased the business in 1998, relocated all operations to Ashland, Ohio in 1999 and changed the name to Ashland Conveyor Products. Due to continued growth, in 2009 ACP relocated to a new custom designed facility in Ashland. We look forward to a visit if you are in the neighborhood.

We offer a standard line of gravity roller conveyor, skatewheel conveyor, telescoping gravity conveyor, powered belt conveyor, ball transfer tables and ball transfers, along with a complete selection of accessories.

At Ashland Conveyor Products we pride ourselves on producing custom conveyor products to meet your individual application. The custom solutions in the back of this catalog highlight examples of how we will develop conveyor products to provide the best solution for your unique application.

The goal of Ashland Conveyor is to provide our customers with products and solutions that exhibit the highest quality, dependability, and value.

Let us help you with your next conveyor project.

## Shipping

All weights in this catalog are conveyor weights only and do not include accessories, crating, or other packaging materials.

All orders will be shipped "dock to dock" F.O.B. Ashland, Ohio 44805.

Shipping Classifications:

Conveyor Sections-----	77-1/2
Conveyor Parts (stands, rollers, etc.)-----	65
Telescoping Conveyor-----	85
Power Conveyors-----	175

## Delivery

Items in highlighted in this catalog indicate quick ship products. These products normally ship in 1-3 days.

## Warranty

All Ashland Conveyor Products carry a 1 year limited warranty.

# GRAVITY SKATEWHEEL CONVEYOR

## General Information

Ashland Conveyor Product's gravity skatewheel conveyors are available in many size and configurations as shown on the following pages. There are many factors to consider when selecting a skatewheel conveyor. The following is intended to aid in the selection process.

### Load Type

Gravity skatewheel conveyor will convey lightweight loads that have firm flat bottoms such as cartons, totes, cases, etc. Skatewheel conveyor "rolls" more easily than roller conveyor allowing for lighter packages and less slope. Also the individual wheels in the curve sections allow packages to track more so than roller conveyor.

### Wheel Density

Wheel density is described as wheels per foot. There must be a minimum of three axles and five wheels under the load at all times.

### Wheel Capacity

Wheel capacities are available at 75 and 100 lbs. in zinc plated steel, 75 lbs. in aluminum and 75 lbs. in plastic. The wheel density must provide enough wheels under the load so that the total wheel capacity exceeds the maximum load.

### Frame Capacity

The frame must be capable of supporting both the conveyed items and the skatewheel conveyor. Frame capacities are provided for 5 foot and 10 foot support centers. Applications that exceed these frame capacities may require additional supports.

### Frame Couplers

Standard couplers for skatewheel conveyor are hook and rod. Hook and rod couplers allow for quick set-up. Butt couplings are available upon request.

### Curves

Often curves will determine the width of the conveyor system, as the product requires additional space to negotiate the turn. This additional space depends upon the length and width of the product.

Refer to the following table:

Skatewheel Curve Width  
(Based on full inside frame coverage)

Load Width	Load Length										
	8"	10"	12"	14"	16"	18"	20"	22"	24"	26"	28"
8"	12" OAW										
10"	18" OAW										
12"	24" OAW										
14"	24" OAW										
16"	24" OAW										
18"	24" OAW										
20"	24" OAW										

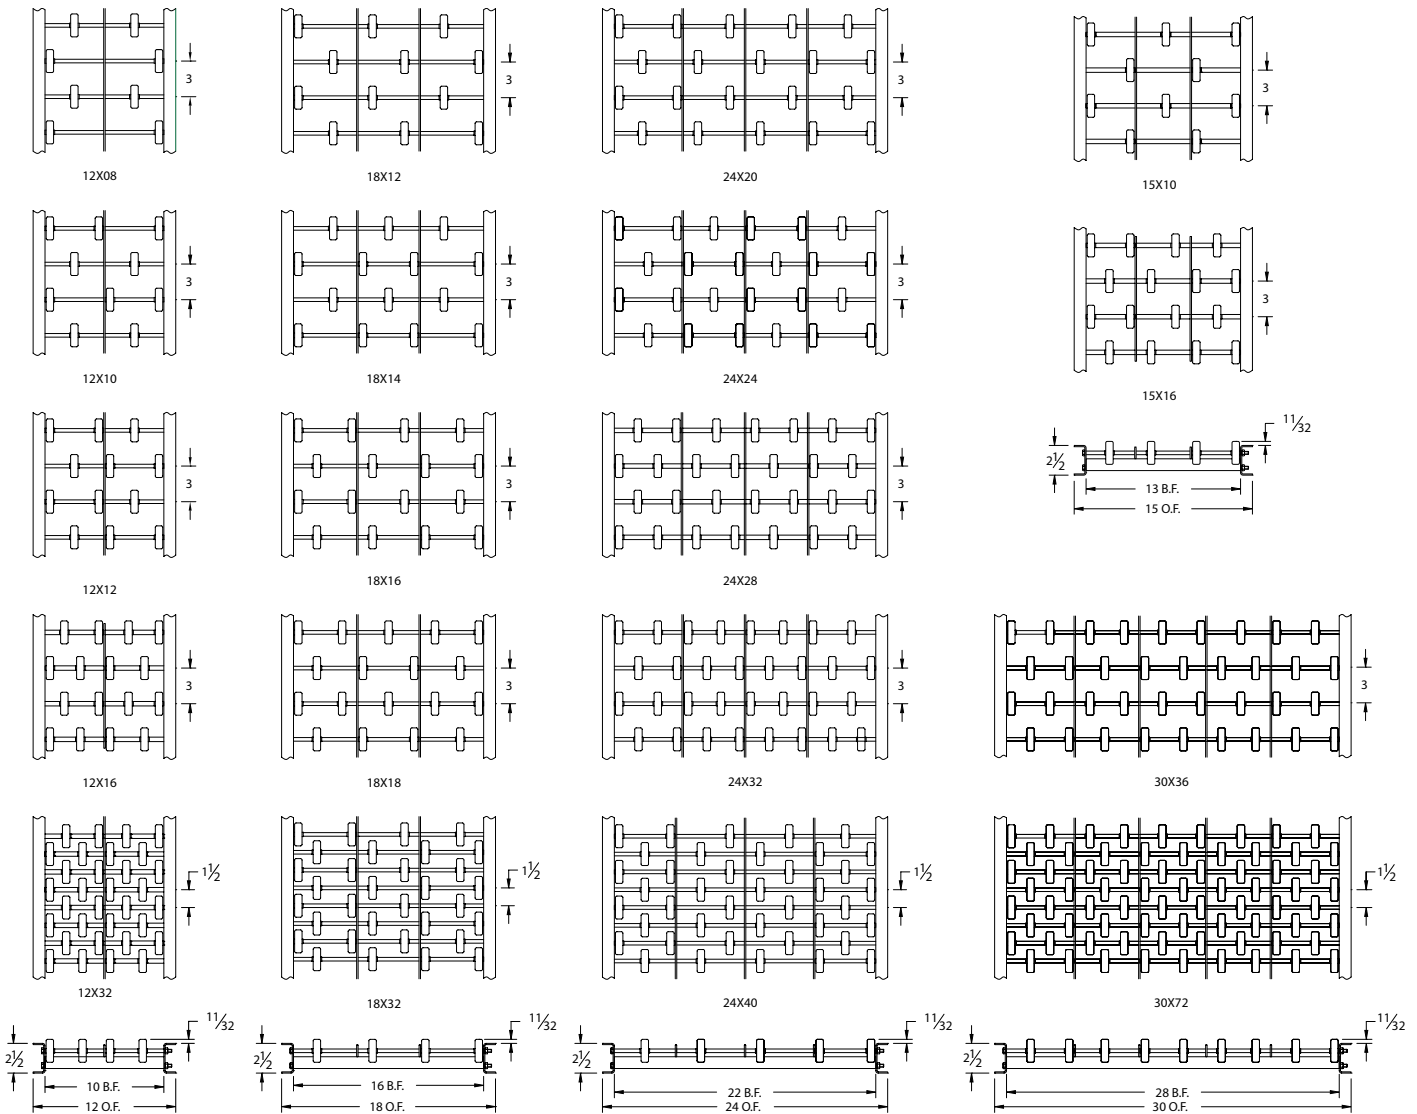

### Floor Supports

Both the weight of the conveyed items and the conveyor must be considered when selecting floor supports. The nominal height of the support is to the bottom of the conveyor frame. Either H-stand supports or tripods (temporary set-up) may be selected.

## Patterns & Replacement Parts

### SKATEWHEEL PATTERNS

### SKATEWHEEL PARTS

Part Number	Material	Capacity (Lbs.)	O.D.	Bore	Face Width	Hub Width	Wt. (Lbs.)
10007	Steel - Zinc Plated	75	1-15/16"	1/4"	5/8"	13/16"	.28
10010	Steel - Zinc Plated	100	1-15/16"	1/4"	9/16"	13/16"	.20
10008	Aluminum	75	1-15/16"	1/4"	5/8"	13/16"	.10
22005	Black Nylon	75	1-15/16"	1/4"	5/8"	13/16"	.04

# GRAVITY SKATEWHEEL CONVEYOR

## Straight Sections

Gravity Skatewheel Conveyor is used to transport lightweight packages or for operation that required lightweight sections. Primarily they are used in shipping departments, stocking areas, assembly lines, etc. Hook & rod couplers along with tripod supports make it ideal for temporary set-up.

### STRAIGHT SECTIONS

#### CONSTRUCTION:

**Wheels:** 1-15/16" diameter wheels; 1/4" ball bearings set in hardened raceway, prelubricated, zinc plated steel. Aluminum conveyors include aluminum wheels. Black Nylon wheels available upon request. Indicate with a "P" suffix, example:12X08X05GP. Wheel capacity 75 Lbs. and 100 Lbs.

**Couplings:** Zinc plated hook and rod.

Parts with "SQ" suffix have squared ends, no couplings.

**Axles:** 1/4" diameter steel; one end threaded with locking nut.

**Frame:** 2-1/2" X 1" X 12 ga. channel galvanized steel or 1/8" heat treated aluminum. Bolt together crossbraces.

**Capacity:** Maximum distributed live load

**Frame** Aluminum 16 Lbs./Ft. on 10' support centers  
150 Lbs./Ft. on 5' support centers  
Steel 36 Lbs./Ft. on 10' support centers  
260 Lbs./Ft. on 5' support centers

Maximum load per wheel:

**Wheels** Aluminum 75 Lbs. each  
Steel 75 Lbs. each  
High Cap. 100 Lbs. each  
Nylon 75 Lbs. each

## Spur Sections

Skatewheel Spurs are used to divert products from one conveying line to another. Straight spurs are listed

at 30 and 45 degrees. Curved spurs are listed in 90 degrees only. All spurs must be specified as either right hand

or left hand. For example a left hand 12" OAW 30 degree straight would be 12x12x30SSGL.

## Flow Rails - Models FR1, FR2, FR3, FR4

Flow Rails are constructed of standard skatewheels attached to various angle or channel shapes. They are well suited for storage flow racks. For pallet flow, 100 Lb. wheels are recommended. In addition to the models listed, staggered wheels, plastic wheels, and varying lengths are available.

### CONSTRUCTION:

**Wheels:** 1-15/16" diameter wheels; 1/4" ball bearings set in hardened raceway, prelubricated, zinc plated steel. Aluminum wheels are available. Wheel capacity 75 Lbs. and 100 Lbs.

**Axles:** 1/4" diameter steel; one end threaded with locking nut.

### Frame:

FR1: 2" x 1" x 12 ga. galvanized steel angle.

FR2: 3" x 2-1/4" x 2" x 12 ga. galvanized steel "J" channel.

FR3 & FR4: 2-1/2" x 1" x 12 ga. galvanized steel channel.

Model FR4 1-1/2"

Replace "\_\_" in Part Number with "05" for 5' or "10" for 10' length.

# GRAVITY ROLLER CONVEYOR

## General Information

Ashland Conveyor Product's gravity roller conveyors are available in many sizes and configurations as shown on the following pages. There are many factors to consider when selecting a gravity conveyor. The following is intended to aid in the selection process.

### Load Type

Gravity roller conveyor will convey loads that have firm flat bottoms such as cartons, totes, skids, firm bags, drums, etc.

### Roller size

Roller Size is determined by:

- Load - in general heavier loads will require larger rollers that meet or exceed the load per roller
- Loading conditions - an impact loading condition may require heavier gauge tubing

### Roller Centers

A minimum of three rollers should be in contact with the load at all times. Roller centers may need to be reduced even further in order to reduce the load per roller.

### Rollers Set High or Low

Most roller conveyors can be ordered set high or set low.

**Ashland Conveyor Products standard is set high.** Rollers set high places the load above the frame allowing the load to overhang. Rollers set low places the rollers below the frame allowing the frame to act as a guard. When specifying set low the between frame dimension should allow for one inch clearance on each side of the largest conveyed item.

### Frame Couplers

The two standard frame couplers are butt couplings, 2-1/2", 3-1/2" and 4" channel, and hook and rod couplers, 2-1/2"

channel. Butt couplings are bolted together for more permanent installations while hook and rod couplers are for quick, temporary set-ups (refer to the Frame Styles page).

### Frame Capacity

The frame must be capable of supporting both the conveyed items in addition to the frame and rollers. The Frame Styles page provides frame capacities based on evenly distributed non-impact loads using 5' and 10' support centers.

Applications that exceed these capacities may require additional supports or heavier frames.

### Slope

As a general guide refer to the following table when determining slope. Conveying a heavier, firm surface will require less slope than a lighter, softer surface. Some applications may require brake rollers to retard the speed of conveyed items. **A field test should always be performed to determine proper slope.**

Item	Weight (Lbs.)	Slope Required To Start And Move Product	
		Inches/Foot	Inches/10'
Firm Cartons	5	7/8"	9"
	10	3/4"	7-1/2"
	50	1/2"	5"
	100	3/8"	3-3/4"
Steel Drums	150	3/8"	3-3/4"
	300	1/4"	2-1/2"
Tote	10	1/2"	5"
	25	3/8"	3-3/4"
	50	5/16"	3-1/8"
	100	1/4"	2-1/2"
Pallet With Runners	50	1/2"	5"
	100	7/16"	4-3/8"
	250	3/8"	3-3/4"
	500	5/16"	3-1/8"

### Curves

Often curves will determine the width of the conveyor system, as the product requires additional space to negotiate the turn. This additional space depends upon the length and width of the product. Refer to the following tables and formula.

### Curve Width

$$\text{Min. B.F. Required} = \sqrt{(R + \text{Width})^2 + \left(\frac{\text{Length}}{2}\right)^2} - R + 2$$

### 2-1/2" Channel Frames (36" IR)

40"	11"	15"	18"	22"	26"	29"	33"	37"	41"
44"	12"	16"	19"	23"	26"	30"	34"	38"	41"
48"	13"	17"	20"	24"	27"	31"	35"	38"	42"
52"	14"	18"	21"	25"	28"	32"	35"	39"	43"

### Floor Supports

Both the weight of the conveyed items and the conveyor must be considered when selecting floor supports. The nominal height of the support is to the bottom of the conveyor frame. For hook and rod conveyor either H-stand supports or tripods may be selected.

# GRAVITY ROLLER CONVEYOR

## General Information

### FRAME STYLES

#### 2-1/2" Channel

#### 3-1/2" Channel

Hook & Rod Coupling

Butt Coupling

#### Capacity

- Aluminum 2-1/2" x 1" x 1/8"
  - 16 Lbs./Ft. on 10' support centers
  - 120 Lbs./Ft. on 5' support centers
- Steel 2-1/2" x 1" x 12 ga.
  - 36 Lbs./Ft. on 10' support centers
  - 260 Lbs./Ft. on 5' support centers

#### Capacity

- Aluminum 3-1/2" x 1-3/8" x 1/8"
  - 45 Lbs./Ft. on 10' support centers
  - 420 Lbs./Ft. on 5' support centers
- Steel 3-1/2" x 1-3/8" x 11 ga.
  - 120 Lbs./Ft. on 10' support centers
  - 600 Lbs./Ft. on 5' support centers

## General Information

### 4" Channel

Butt Coupling

### Capacity

Steel 4" x 1-1/2" x 7 ga.

230 Lbs./Ft. on 10' support centers

1,050 Lbs./Ft. on 5' support centers

### 4" Structural

Butt Coupling

### Capacity

Steel 4" x 5.4 Lbs. structural

300 Lbs./Ft. on 10' support centers

1,550 Lbs./Ft. on 5' support centers

## Standard Lower Flange Hole Pattern (10' Length)

# GRAVITY ROLLER CONVEYOR

## B Roller

Tube 3/4" Dia. x 20 Ga. Frame 2-1/2" x 1" x 12 Ga. Steel

### Construction:

**Roller:** Model B

**Tube:** 3/4" O.D. x 20 ga. plain steel

**Axle:** 1/4" diameter steel

**Bearing:** Light oil, press fit

**Axle Retention:** Spring retained

**Frame:** 2-1/2" x 1" x 12 ga. painted steel channel

**Crossbraces:** 1" x 1" x 1/8" steel angle

**Coupling:** Butt plate standard

**Capacity:** Weight of section must be included

Maximum distributed live load:

Frame 36 Lbs./Ft. on 10' support centers  
260 Lbs./Ft. on 5' support centers

Roller Refer to Roller models for capacity

Available Set Low Only

## STRAIGHT SECTIONS - 5' & 10' LENGTHS

# GRAVITY ROLLER CONVEYOR

## EFA Roller

Tube 1-3/8" Dia. x 18 Ga. Frame 2-1/2" x 1" x 1/8" Ga. Al.

### Construction:

**Roller:** Model EFA

**Tube:** 1-3/8" O.D. x 18 ga. aluminium

**Axle:** 5/16" hex steel

**Bearing:** Light oil, swaged

**Axle Retention:** Spring retained

**Frame:** 2-1/2" x 1" x 1/8" aluminium channel

**Crossbraces:** 1" x 1" x 1/8" aluminium angle

**Coupling:** Butt plate standard; Hook & Rod optional

**Capacity:** Weight of section must be included

Rollers Set High  
(Standard)

Rollers Set low

Maximum distributed live load:

Frame 16 Lbs./Ft. on 10' support centers  
120 Lbs./Ft. on 5' support centers

Roller Refer to Roller models for capacity

## STRAIGHT SECTIONS - 5' & 10' LENGTHS

# GRAVITY ROLLER CONVEYOR

Tube 1.9" Dia. x 16 Ga. Frame 3-1/2" x 1-3/8" x 1/8" Al

KA Roller

## Construction:

- Roller:** Model KA
- Tube:** 1.9" O.D. x 16 ga. aluminum
- Axle:** 7/16" hex steel
- Bearing:** Light oil, swaged
- Axle Retention:** Spring retained
- Frame:** 3-1/2" x 1-3/8" x 1/8" aluminum channel
- Crossbraces:** 1-1/2" x 1-1/2" x 1/8" aluminum angle
- Coupling:** Butt plate

**Capacity:** Weight of section must be included  
Maximum distributed live load:

Frame 45 Lbs./Ft. on 10' support centers  
420 Lbs./Ft. on 5' support centers

Rollers Set High  
(Standard)

Roller Refer to Roller models for capacity

Rollers Set low

# GRAVITY ROLLER CONVEYOR

**U Roller Tube 2-1/2" Dia. x 14 Ga. Frame 3-1/2" x 1-3/8" x 11 Ga. Steel**

## Construction:

**Roller:** Model U

**Tube:** 2-1/2" O.D. x 14 ga. plain steel

**Axle:** 7/16" hex steel

**Bearing:** Light oil, swaged

**Axle Retention:** Spring retained

**Frame:** 10F: 3-1/2" x 1-3/8" x 11 ga. painted steel channel. 7F: galvanized steel

**Crossbraces:** 1-3/4" 11 ga. angle

**Coupling:** Butt plate

**Capacity:** Weight of section must be included

Maximum distributed live load:

**Frame** 120 Lbs./Ft. on 10' support centers

600 Lbs./Ft. on 5' support centers

**Rollers Set High**  
(Standard)

**Rollers Set low**

**Galvanized Steel Frames Available Use 7F Prefix**

**Roller** Refer to Roller models for capacity

# GRAVITY ROLLER CONVEYOR

Tube 2-5/8" Dia. x 7 Ga. Frame 4" x 1-1/2" x 7 Ga. Steel

T Roller

## Construction:

- Roller:** Model T
- Tube:** 2-5/8" O.D. x 7 ga. plain steel
- Axle:** 11/16" hex steel
- Bearing:** Light oil, swaged
- Axle Retention:** Spring retained
- Frame:** 4" x 1-1/2" x 7 ga. painted steel channel
- Crossbraces:** 1-3/4" 11ga. angle
- Coupling:** Butt plate
- Capacity:** Weight of section must be included

Maximum distributed live load:

Frame 230 Lbs./Ft. on 10' support centers  
1,050 Lbs./Ft. on 5' support centers

Roller Refer to Roller models for capacity

43" BF and above are only available in 45 degree curves (Two 45 degrees = One 90 degree)

# GRAVITY ROLLER CONVEYOR

**T Roller Tube 2-5/8" Dia. x 7 Ga. Frame 4" x 5.4 Lbs. Structural Steel**

## Construction:

- Roller:** Model T
- Tube:** 2-5/8" O.D. x 7 ga. plain steel
- Axle:** 11/16" hex steel
- Bearing:** Light oil, swaged
- Axle Retention:** Spring retained
- Frame:** 4" x 5.4 Lbs. structural painted steel channel
- Crossbraces:** 1-3/4" x 1-3/4" x 3/16" steel angle
- Coupling:** Butt plate
- Capacity:** Weight of section must be included

Maximum distributed live load:

**Frame** 300 Lbs./Ft. on 10' support centers  
1,550 Lbs./Ft. on 5' support centers

**Roller** Refer to Roller models for capacity

Replace "\_\_" in Part Number with "90" for 90 degree or "45" for 45 degree.

# REPLACEMENT ROLLERS

## General Information

The following information is intended to guide you through the proper application and selection of conveyor rollers. For specific rollers not listed in this catalogue contact a sales representative at Ashland Conveyor Products.

## BF or Between Frame Dimension

The length of conveyor rollers is normally described in terms of BF, the dimension between the frame or between the rails of the conveyor.

## Bearings

- Standard roller construction utilizes “commercial grade” (also known as “non precision”) bearings.
- Standard bearing lubrication is light oil however, grease packed is also available.
- Generally light oil lubrication is used for gravity applications as it rotates more easily.
- Semi-precision and precision bearings are also available.
- Grease packed is normally used for power conveyor applications or harsh environments.
- Seals on grease packed bearings refer to materials that are used to impede partical (non-liquid) type items from entering the bearings.
- Ashland does not provide waterproof bearings.
- Abec 1 bearings have significantly lower noise levels, longer life and are useable in applications up to 2000 RPM.

BEARING TYPE & LUBRICATION	ABBREVIATION	APPLICATION	BENEFIT	SPEED RATING	LOAD RATING
Commercial Light Oil <i>(Standard)</i>	CO LO	Gravity Conveyor	Free Rolling, Cost Effective	Up to 200 RPM	Low
Commercial Grease Packed w/ Seals <i>(Optional)</i>	CO GP FTS	Low Speed Powered Conveyors	Grease adds bearing life, Cost effective	Up to 200 RPM	Low
Semi-Precision Grease Packed w/ Seals <i>(Optional)</i>	SP GP FTS	Medium Speed Powered Conveyors	Caged Ball Bearings Higher Speed longer life	Up to 1200 RPM	Medium
Precision (ABEC 1) Sealed <i>(Optional)</i>	AB1	High Speed Powered Conveyors	Tighter Tolerances = Higher Speed + Lower Noise	Up to 2000 RPM	High

### Roller Capacity

Roller capacities are calculated to CEMA standards. The capacity is limited to the bearing capacity, shaft deflection, tube deflection, or tube strength. Refer to specific roller tables for roller capacities. All capacities based on evenly distributed non-impact loads across entire roller.

### Axle Construction

Spring retained axle rollers are Ashland Conveyor Products standard construction. Spring retained axle rollers contain a spring that is captured between one of the bearings and a dimple on the shaft. When pushed on one end the shaft will slide through the roller allowing for insertion into the frame.

Pin retained rollers contain no spring or dimples to retain the shaft. Instead, the shaft is drilled on each end for a retaining pin. Once a roller is placed in a frame the retaining pins are inserted. Pin retained rollers must be specified at the time of quoting and ordering.

### Grooved Rollers

Grooved rollers are used on powered conveyors using urethane O-rings (lineshaft) or V-belt driven powered conveyors. While Ashland Conveyor Products does not manufacture these conveyors we can provide you replacement rollers for your conveyors. We offer 1/4" and 7/32" Radius grooves and a number of grease packed bearing options (please see chart on page 34-35 for details). Note: all measurements should be referenced from bearing hub.

Rollers Available with Grooves	
K	1.9" x 16 ga. Plain Steel
KG	1.9" x 16 ga. Galv Steel
DG	1.9" x 12 ga. Galv Steel
S	2.5" x 11 ga. Plain Steel
SG	2.5" x 11 ga. Galv Steel

# REPLACEMENT ROLLERS

## General Information

### Sprocketed Rollers

Sprocketed rollers are used for chain driven live roller conveyors. A typical arrangement is illustrated below. Standard construction includes grease packed and sealed bearings. Can be supplied as spring or pin retained. Length measurement should be from bearing hub to bearing hub.

Rollers Available with Sprockets	
K	1.9" x 16 ga. Plain Steel
KD	1.9" x 9 ga. Plain Steel
S	2.5" x 11 ga. Plain Steel
T	2-5/8" x 7 ga. Plain Steel
U	2.5" x 14 ga. Plain Steel

### Polyurethane Covered Rollers

Factory installed 1/8" thick (83 shore "A") polyurethane covers provide the following advantages:

- Will not mar finish on sensitive products being conveyed.
- Absorbs shock and reduce noise by up to 10 decibels.
- Have extraordinary cut and abrasion resistance for long life.
- Increases traction by up to 15% vs. uncoated rollers.

Rollers Available with Polyurethane Sleeves	
EG, EA, CS, EFG, EFA, CFG, CG	1-3/8" x 18 ga. Galv. Aluminum & Stainless Steel
KG, KS, KA, DG	1.9" x 16 ga. + 12 ga. Galv. Aluminum & Stainless Steel
SG	2-1/2" x 11 ga. Galvanized

See chart on pages 34 - 35.

# REPLACEMENT ROLLERS

## General Information

### Diameter and Gauge

The tube diameter and gauge are required when specifying a roller. The diameter is the outside diameter of the tubing and the gauge is the wall thickness of the tubing. The following diameters and gages are Ashland Conveyor Products standards. Also shown are tube materials and shaft size.

TUBE DIAMETER X GAGE (Wall)	TUBE MATERIAL	SHAFT SIZE & SHAPE: MATERIAL PS=Plain Steel SS=Stainless Steel	STANDARD COMMERCIAL BEARING Light Oil Model #	PAGE #	OPTIONAL BEARINGS

EFG20	20"	1.89	94
EFG21	21"	1.98	94
EFG22	22"	2.06	94

### Construction:

**Tube:** 1-3/8" O.D. x 18 ga. **galvanized steel**

**Optional:** Polyurethane Sleeves Available

**Axle:** 5/16" hex steel

**Bearing:** Commercial light oil

**Axle Retention:** Spring retained

**Weight:** .25 + (.08 x BF)

**Shaft Length:** BF+1-1/8"

Shorter, longer, and in-between  
BF's available.

# POWER BELT CONVEYOR

## Slider Bed - Model SB400

The Model SB400 slider bed conveyor provides a low cost smooth conveying surface which may be used for many applications such as:

- Packing
- Inspecting
- Sorting
- Testing

### Warning!

To prevent pinch points that exist when power conveyors are placed adjacent to other conveyors or equipment use pop-out brackets and rollers.

## STANDARD CONSTRUCTION

**Belting:** PVC 120.

**Bed:** 12 gauge painted formed steel, 4" deep. Sections are bolted together with splice plates and floor supports.

**Drive Pulley:** 4" and 8" diameter crowned and lagged, with 1-3/16" and 1-7/16" diameter shaft.

**Tail Pulley:** 4" diameter crowned with 1-3/16" diameter shaft.

**Return Rollers:** 1.9" diameter adjustable.

**Take-Up:** 6" take-up travel.

**Bearings:** Sealed and prelubricated with cast iron housings.

**Motor:** 1/2 HP 230/460, 3 phase, 60 HZ, TEFC.

**Belt Speed:** 60 FPM constant.

## OPTIONAL EQUIPMENT

**Belting:** PVC white, PVC rough top, special belts upon request.

**Guard Rails:** 2-1/2" and 3-1/2" fixed channel guards, refer to Accessories section.

**Floor Supports:** Refer to Supports section, castored supports available. BF required is belt width plus 2".

**Pop-Out Roller:** Pop-out roller assemblies for use when equipment is placed adjacent to head pulley.

**Center Drive:** Used for reversing applications.

**Overhead Drive:** Solution for underside clearance problem.

**Auxiliary Take-Up:** Provides additional 12" belt take-up, required on units longer than 51'.

**Motor:** Other voltages, single phase, energy efficient, inverter duty, etc. Other HP available.

**Belt Speed:** Other constant and variable speeds available.

**Controls:** Manual starters, magnetic starters, push button stations, photo eyes, etc. are available.

Optional Overhead Drive (Right Hand Drive Shown)

# POWER BELT CONVEYOR

## Slider Bed - Model SB350

The Model SB350 slider bed conveyor provides a low cost smooth conveying surface which may be used for many applications such as:

- Assembly
- Packing
- Sorting
- Testing

### STANDARD CONSTRUCTION

**Belting:** PVC 120.

**Bed:** 14 ga. steel.

**Drive Pulley:** 4" and 8" diameter crowned and lagged, with 1-3/16" and 1-7/16" diameter shaft

**Frame:** 3-1/2" x 1-3/8" x 11 ga. steel channel

**Tail Pulley:** 4" diameter crowned with 1-3/16" diameter shaft.

**Return Rollers:** 1.9" diameter adjustable.

**Take-Up:** 6" take-up travel, center drive 12"

**Bearings:** Sealed and prelubricated with cast iron housings.

**Motor:** 1/2 HP 230/460, 3 phase, 60 HZ, TEFC.

**Belt Speed:** 60 FPM constant.

### Warning!

To prevent pinch points that exist when power conveyors are placed adjacent to other conveyors or equipment use pop-out brackets and rollers.

### OPTIONAL EQUIPMENT

**Belting:** PVC white, PVC rough top, special belts upon request.

**Guard Rails:** 2-1/2" and 3-1/2" fixed channel guards, refer to Accessories section.

**Floor Supports:** Refer to Supports section, castered supports available. BF required is belt width plus 3".

**Pop-Out Roller:** Pop-out rollers included at each end.

**Center Drive:** Used for reversing applications.

**Auxiliary Take-Up:** Provides additional 12" belt take-up, required on units longer than 51'.

**Motor:** Other voltages, single phase, energy efficient, inverter duty, etc. Other HP available.

**Belt Speed:** Other constant and variable speeds available.

**Controls:** Manual starters, magnetic starters, push button stations, photo eyes, etc. are available.

Power Belt Conveyors

# POWER BELT CONVEYOR

## Roller Bed - Model RB190

The Model RB190 roller bed will transport heavier unit loads. The roller bed reduces friction, provides greater capacity and is well suited for moving product throughout a facility.

### Warning!

To prevent pinch points that exist when power conveyors are placed adjacent to other conveyors or equipment use pop-out brackets and rollers.

## STANDARD CONSTRUCTION

**Belting:** PVC 120.

**Bed:** 1.9" x 16 ga. galvanized steel rollers on 6" centers.

**Frame:** 3-1/2" x 1-3/8" x 11 ga. steel channel

**Drive Pulley:** 4" and 8" diameter crowned and lagged, with 1-3/16" and 1-7/16" diameter shaft

**Tail Pulley:** 4" diameter crowned with 1-3/16" diameter shaft.

**Return Rollers:** 1.9" diameter adjustable.

**Take-Up:** 6" take-up travel, center drive 12".

**Bearings:** Sealed and prelubricated with cast iron housings.

**Motor:** 1/2 HP 230/460, 3 phase, 60 HZ, TEFC.

**Belt Speed:** 60 FPM constant.

## OPTIONAL EQUIPMENT

**Belting:** PVC white, PVC rough top, special belts upon request.

**Roller Centers:** 3" roller centers available.

**Guard Rails:** 2-1/2" and 3-1/2" fixed channel guards, refer to Accessories section.

**Floor Supports:** Refer to Floor Supports section, casted supports available. BF required is belt width plus 3".

**Pop-Out Roller:** Pop-out rollers included at each end.

**Center Drive:** Used for reversing applications.

**Auxiliary Take-Up:** Provides additional 12" belt take-up, required on units longer than 51'.

**Motor:** Other voltages, single phase, energy efficient, inverter duty, etc. Other HP available.

**Belt Speed:** Other constant and variable speeds available.

**Controls:** Manual starters, magnetic starters, push button stations, photo eyes, etc. are available.

# POWER BELT CONVEYOR

## Slider Bed Incline - Model SBI350

The Model SBI350 incline conveyor provides a smooth conveying surface and allows movement of cartons, boxes, etc., floor-to-floor in either direction. It can also be used to increase elevation in gravity flow situations.

Left Hand Drive Shown

### STANDARD CONSTRUCTION

**Belting:** PVC 120 rough top.

**Bed:** 12 ga. steel. **Frame:** 3-1/2" x 1-3/8" x 11 ga. steel channel

**Drive Pulley:** 8" diameter crowned and lagged, with 1-7/16" diameter shaft

**Tail Pulley:** 4" diameter crowned with 1-3/16" diameter shaft.

**Return Rollers:** 1.9" diameter adjustable.

**Take-Up:** 12" take-up travel.

**Bearings:** Sealed and prelubricated with cast iron housings.

**Motor:** 3/4 HP 230/460, 3 phase, 60 HZ, TEFC.

**Belt Speed:** 60 FPM constant.

**Drive:** Right hand center drive standard, allows for reversing operation.

**Noseover:** Double noseover included, adjustable from 0-30 degrees.

### OPTIONAL EQUIPMENT

**Belting:** Special belts upon request.

**Guard Rails:** 2-1/2" and 3-1/2" fixed channel guards, refer to Accessories section.

**Floor Supports:** Refer to Floor Supports section, castered supports available. BF required is belt width plus 3".

**Ceiling Hangers:** Ceiling hangers available, refer to supports section.

**Pop-Out Roller:** Pop-out rollers included at each end.

**Motor:** Other voltages, single phase, energy efficient, inverter duty, etc. Other HP available.

**Power Feeder:** Chain driven power feeder available to provide a smooth transition to incline.

**Belt Speed:** Other constant and variable speeds available.

**Controls:** Manual starters, magnetic starters, push button stations, photo eyes, etc. are available.

Left Hand Drive Shown

### Warning!

To prevent pinch points that exist when power conveyors are placed adjacent to other conveyors or equipment use pop-out brackets and rollers.

## Roller Bed Incline - Model RBI190

The Model RBI190 incline conveyor allows movement of cartons, boxes, etc., floor-to-floor in either direction. The roller bed provides a higher capacity and can also be used to increase elevation in gravity flow situations.

Left Hand Drive Shown

### STANDARD CONSTRUCTION

- Belting:** PVC 120 rough top.
- Bed:** 1.9" x 16 ga. galvanized steel rollers on 6" centers.
- Frame:** 3-1/2" x 1-3/8" x 11 ga. steel channel
- Drive Pulley:** 8" diameter crowned and lagged, with 1-7/16" diameter shaft
- Tail Pulley:** 4" diameter crowned with 1-3/16" diameter shaft.
- Return Rollers:** 1.9" diameter adjustable.
- Take-Up:** 12" take-up travel.
- Bearings:** Sealed and prelubricated with cast iron housings.
- Motor:** 3/4 HP 230/460, 3 phase, 60 HZ, TEFC.
- Belt Speed:** 60 FPM constant.
- Drive:** Right hand center drive standard, allows for reversing operation.
- Noseover:** Double noseover included, adjustable from 0-30 degrees.

### OPTIONAL EQUIPMENT

- Belting:** Special belts upon request.
- Roller Centers:** 3" roller centers available.
- Guard Rails:** 2-1/2" and 3-1/2" fixed channel guards, refer to Accessories section.
- Floor Supports:** Refer to Floor Supports section. BF required is belt width plus 3".
- Ceiling Hangers:** Ceiling hangers available, refer to Supports Section
- Pop-Out Roller:** Pop-out rollers included at each end.
- Motor:** Other voltages, single phase, energy efficient, inverter duty, etc. Other HP available.
- Power Feeder:** Chain driven power feeder available to provide a smooth transition to incline.
- Belt Speed:** Other constant and variable speeds available.
- Controls:** Manual starters, magnetic starters, push button stations, photo eyes, etc. are available.

Left Hand Drive Shown

### Warning!

To prevent pinch points that exist when power conveyors are placed adjacent to other conveyors or equipment use pop-out brackets and rollers.

# POWER BELT CONVEYOR

## General Information

Because of their versatility and low cost, belt conveyors are the most commonly used type of powered conveyor. A belt conveys the product on either a slider or roller bed.

### Slider Bed Conveyors

The slider bed provides a quiet smooth conveying surface for light to medium loads. Because the belt slides on a metal bed a relatively high coefficient of friction is created, this reduces the load carrying capacity compared to a roller bed conveyor.

### Roller Bed Conveyors

Higher loads and less horsepower for the same load is one reason to select a roller bed conveyor versus a slider bed conveyor. Since the belt rides on free turning rollers the coefficient of friction is much less.

### Controls

Common controls that are available include: manual motor starters, magnetic starters, push buttons, variable speed controllers, safety cable pulls, etc. Please specify at the time of quoting which controls are required and whether installation is desired.

### Incline/Decline

The correct degree of incline or decline must be selected in order for the load not to tumble. Generally the degree of incline should not cause a vertical line drawn from the load's center of gravity to lie in the lower 1/3 of the load's length.

### Roller Spacing

It is good practice to have at least three rollers under the product at all times. The load capacity per roller must not be exceeded. Standard roller spacing is six inches.

### Product Weight

The power required for a slider bed conveyor is approximately six times greater than for a roller bed conveyor. Slider bed conveyors are used to convey light products or products that have a small irregular base, and where smooth travel is required. Refer to load capacity tables for each power conveyor.

### Belt

The standard conveyor belt is a PVC 120 smooth top for horizontal conveyors and a PVC 120 rough top for incline conveyors. Other types of belting are available upon request.

### Supports

Normally select either the H15 or H30 floor supports. Castered supports are available only in the H30 model. Refer to each belt conveyor model to determine the correct BF floor support.

### Maximum Degree of Incline/ Decline

		Product Height								
		4	8	12	16	20	24	28	32	36
Product Length	4	18	9	6	4	3	3	2	2	2

## Incline Lift Chart

# POWER BELT CONVEYOR

## Optional Equipment - Pop-Out Brackets

Pop-Out Brackets are used when placing a belt conveyor adjacent to other conveyors or equipment. The bracket and roller assembly allow the roller to "pop-out" if an object becomes entangled between it and the belt.

### Warning!

To prevent pinch points that exist when power conveyors are placed adjacent to other conveyors or equipment use pop-out brackets and rollers.

### SB400

For SB400 belt conveyors, use at head pulley and also tail pulley if the conveyor is reversing. The 4" pulley model allows hook and rod gravity conveyor to be attached using the included shoulder bolts. Gravity conveyor OF must be 6" more than the belt width. Model KG roller included.

## Optional Equipment - Power Feeder

Power feeders are for use with RBI190 and SBI350 incline conveyors. Power feeders ensure a smooth transition to an incline conveyor.

### Construction:

**Belting:** PVC 120 with staple lacing. Other belts available.

**Drive Pulley:** 4" diameter, crowned and lagged; 1-3/16" diameter shaft.

**Tail Pulley:** 4" diameter, crowned.

**Drive:** Driven from tail pulley of conveyor at a 1:1 ratio. Other ratios available. RH standard; LH available.

**Take-Up:** 12" belt take-up at tail pulley

**Bearings:** Sealed and prelubricated with cast iron housings

**Frame:** 3-1/2" x 1-3/8" x 11 ga. channel painted steel

#### Bed:

## Light Duty H-Stand - Model H15

The H15 1500 lb. capacity H-Stand support may be used with gravity skatewheel, gravity roller conveyor (2-1/2" and 3-1/2" frames), and power belt conveyor. The h-stand is used for permanent, as opposed to portable, conveyor installations. Single legs are available for curves if desired.

### Construction:

**Upper Legs:** 12 ga. steel

**Lower Legs:** 12 ga. steel

**Pivot Brackets:** 12 ga. steel

**Crossbraces:** 1-3/4" 11 ga. angle

**Floor Pad:** 3/16" steel

**Widths:** Standard BF's include: 4, 5, 7, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 39, 41, 42, 43, 46, 47, 48, 51 Other BF's available

**Capacity:** 1, 500 Lbs.

**Packaging:** Shipped unassembled, factory assembly additional charge

## Medium Duty H-Stand - Model BH30

The 3BH30 3000 lb. capacity H-Stand support may be used with gravity skatewheel, gravity roller conveyor (2-1/2" and 3-1/2" frames), and power belt conveyor while the 4BH30 may be used with gravity roller conveyor (4" frames). The H-Stand is used for permanent, as opposed to portable, conveyor installations. Single legs are available for curves.

### Construction:

**Legs:** 11 ga. steel

**Pivot Brackets:** 3BH 12 ga. steel, 4BH 10 ga. steel

**Crossbraces:** 2-1/2" x 1" x 12 ga. steel channel

**Floor Pad:** 3/16" steel

**Widths:** Standard BF's include: 7" to 51", other BF's available

**Capacity:** 3,000 Lbs.

**Packaging:** Shipped unassembled

## Medium Duty H-Stand - Model BH30 Castered

The BH30 castered support has a 2000 lb. capacity and uses 5" diameter swivel wheels (details page 69) with side-lock brakes. These supports may be used with gravity skatewheel, gravity roller conveyor having 2-1/2" and 3-1/2" frames and powered belt conveyors. Castered supports make conveyor sections portable on smooth floor surfaces and should not be used on uneven surfaces and floors with items that could block wheels and cause conveyor to tip. 9 BF minimum due to casters.

Knee braces (page 69) are recommended and sold separately

### Construction:

**Upper Legs:** 11 ga. steel

**Lower Legs:** 11 ga. steel

**Pivot Brackets:** 3BH 12 ga. steel, 4BH 10 ga. steel

**Crossbraces:** 2-1/2" x 1" x 12 ga. steel channel

**Floor Pad:** 3/16" steel

**Capacity:** 2,000 Lbs.

Kneebraces provide added structural support between the conveyor and floor support. Recommended for use with nose-over units, supports with casters, or free standing conveyors.

### Construction:

**Kneebrace:** 1-1/2" x 3/16" painted steel

**Bracket:** 1-1/2" x 1-1/2" x 1/8" steel angle

Part Number	Length	Applications	Wt. (Lbs.)
KB16	16"	2-1/2" & 3-1/2" Frames	4
KB25	25"	Powered Conveyors	5.5
KB16H50*	16"	H50 5000# Supports	4

\* For H50-5000Lb. supports

Use KB25 for Nose Over applications

Above includes 2 sets of kneebraces, brackets, & fasteners

Some field drilling may be needed

## Casters

### Construction:

Casters are available in 5" and 8" diameter in either swivel or rigid style. **Casters will not mount to standard supports.** Support requires a caster base plate. The swivel has sidelocks. **Capacity:** 1,000 Lbs.

Swivel Caster

Rigid Caster

## Ceiling Hanger - Model CH

Ceiling hangers provide a safe means of providing higher elevation than floor supports. Also floor space can more readily be utilized. Ceiling hangers may be used with all conveyors. Conveyor guarding is recommend for overhead applications.

### Construction:

**Crosspipe:** 1" IPS schedule 40

**Hat Bracket:** 7 ga. steel

**Hanger Rods:** 5/8 all thread, 8' long

**Capacity:** 1, 250 Lbs.

PartNumber	Wt. (Lbs.)
CHB__	20 + (BF x .15)

Replace "\_\_" in Part Number with BF.

**Note:** For power conveyor applications add Spacer Kit part number 44632

Ashland's Telescoping Conveyor is a durable, low maintenance product designed to reduce the time and effort required to hand load and unload trailers. Unlike "expanding" conveyors, the centerline distance between rollers remains unchanged at any extension. Also, each section is individually replaceable.

There are two basic models in three widths and five lengths with a range of elevations and slopes. You may also choose between roller or skatewheel conveyor.

Ease of operation is one of the reasons warehouse managers prefer Ashland Telescoping Conveyors. Our unique design suspends the lower sections by ball bearings which glide inside the side channels of the section above.

The Legs are equipped with 5" diameter swivel casters. Casters with a diameter of 8" are standard on 6 section telescopes and available as an option on others. Ashland Telescoping Conveyors extend so easily that a 5 section unit with 3" slope per 10' will extend itself on a smooth floor.

The package stop also serves as a handle to extend and retract the conveyor.

Durability is another reason our product is preferred. The main frame stringers are formed from 7 ga. steel plate. All other formed parts are either 10 ga. or structural steel. The legs are secured in place with 1/2" heat treated bolts. Our customers have testified that units have fallen from the dock and were put back into service without any repair. Durability and weight are synonymous in telescoping conveyors. Compare the weight of our product with other brands.

To specify a telescoping conveyor you will need to know the following:

1. Overall length or number of 10' sections
2. High end (upper) elevation
3. Required slope or low elevation
4. Overall width
5. Model (skatewheel or roller)
6. 5" or 8" diameter casters

The elevation/slope tables will aid in the selection process. Please note the slope must be a whole number (1" through 6" per a 10' section).

The slope may vary from section to section; however, the slope must be constant or increase as you descend through the sections. **The slope cannot decrease.**

Telescopes ship fully assembled less the attachment of the transition sections and the safety stop bracket.

Telescopes must be shipped via dedicated carrier, secured to trailer.

- \* Elevations not adjustable
- The Number in the model following the letter "T" refers to the number of sections. The next number refers to model A, B, C, or D which determines high and low elevations. The last number refers to the caster diameter.
- Substituting 8" for 5" casters adds 3" to all heights except 6 section units.
- Six section units are **only available with 8" diameter casters.**

# TELESCOPING CONVEYOR

## Skatewheel on All Sections

The all-skatewheel style is best suited to handle products that weigh an average of 10 lbs or less. A slope of 3" - 6" per 10' should be adequate for proper flow.

### Options:

1. 8" diameter casters for uneven floor/dock situations; adds 3" to all heights.
2. Transition rollers on 1-1/2" centers
3. Contact a representative for information concerning transition herringbone sections that help center packages.

### Construction:

**All Sections:** 2-1/2" x 1" x 12 ga. galvanized steel frames with 1-15/16" diameter skatewheels.

**Main Frame:** 10 ga. formed steel channel

**Transition Sections:** 1-3/8" x 18 ga. galvanized steel rollers; 3" centers.

**Casters:** 5" diameter swivel standard up to 5 section units; 8" diameter on 6 section units.

**Floor Locks:** Foot activated standard on each end.

**Capacity:** 140 Lbs. per foot.

# TELESCOPING CONVEYOR

1-3/8 x 16 Ga. On All Sections

This unit is best utilized for hand loading of products. A slope of 2" - 4" per 10' should be adequate for proper flow of product over 40 pounds; and 4" - 6" per 10' for 5 - 40 pound product. The rollers at close centers in the top section provide a smooth transition between existing systems and the telescope conveyor.

## Construction:

**All Sections:** 2-1/2" x 1" x 12 ga. galvanized steel frames with 1-3/8" x 18 ga. galvanized steel rollers on 1-1/2" centers

**Main Frame:** 10 ga. formed steel channel

**Transition Sections:** 1-3/8" x 18 ga. galvanized steel rollers; 1-1/2" centers.

**Casters:** 5" diameter swivel standard up to 5 section units; 8" diameter on 6 section units.

**Floor Locks:** Foot activated standard on each end.

**Capacity:** 140 Lbs. per foot.

## Options:

1. 8" diameter casters for uneven floor/dock situations; adds 3" to all heights.
2. Contact a representative for information concerning transition herringbone sections that help center packages.

# BALL TABLES

## Ball Transfer Tables

Ball transfer units are used where product must change direction or at an intersection of two conveyors. Table assemblies are designed to match-up with 1.9" diameter roller conveyor frames. For existing conveyors, the drop-in insert plate design allows for the removal of rollers and ball assembly insert plates to be "dropped-in" and bolted, applies to 1.9" & 1-3/8" roller conveyors. **Stands not included with ball table assemblies.**

### Construction:

**Ball Assemblies:** 1" diameter steel ball with a 1-3/4" diameter steel housing, 1/4-20 center post mount.

**Frame:** 3-1/2" x 1-3/8" x 11 ga. painted steel channel with butt plates.

**Insert Plates:** 6" x 1" x 12 ga. galvanized channel; bolts into side frames; ball holes punched on 1" centers.

**Widths:** Standard BF's include 10", 16", 22" & 36".

**Capacity:** Maximum distributed live Load:

Frame 120 Lbs./Ft. on 10' support centers  
600 Lbs./Ft. on 5' support centers (except 36" BF)  
500 Lbs./Ft. on 5' support centers for 36" BF

Ball Assembly 75 Lbs. each

**Note: Welded construction tables available in different widths and lengths.**

# BALL TABLES

## Ball Transfers

Ball transfers allow for change of direction and rotation. Ideal for free movement of tools, dies, fixtures, containers, and assemblies. Use where smooth-surfaced items must change directionsuch as the intersection of two conveyors. Applications include conveyor system ball transfer tables, turntables, sorting tables, cargo decks, feed tables for metal working, die and fixture handling and storage and assembly lines.

Ball transfers make light work of directing, shifting, rotating, and turning loads in material handling applications.

Ball transfers are widely used in many industrial applications including:

Conveyor systems needing turntables, redirection, or cargo decks.

Machinery feed tables or die change tables.

Industrial caster applications.

All ball transfers are sealed and lubricated for long life (except nylon ball). Carbon steel components are zinc plated.

Part Number	Conveyor	Inside Radius	Channel	Wt. (Lbs.)
GU310	10' Straight	-	Galvanized	32
GU390__R30	90 Degree	30"	Galvanized	23
GU390__R36	90 Degree	36"	Galvanized	28
GU3A10	10' Straight	-	Aluminum	13
GU3A90__R30	90 Degree	30"	Aluminum	10
GU3A90__R36	90 Degree	36"	Aluminum	12

Replace "\_\_" in Part Number with BF

When ordering for curve, specify inner radius & conveyor style

## Guard - Model GU4

### Construction:

**Rail:** 3-1/2" x 1-3/8" x 11 ga. galvanized steel or 3-1/2" x 1-3/8" x 1/8" aluminum channel. Set of 2 rails included.

**Attachment:** Bolted to top flange of conveyor frame; hardware included.

Part Number	Conveyor	Inside Radius	Channel	Wt. (Lbs.)
GU410	10' Straight	-	Galvanized	50
GU490__R30	90 Degree	30"	Galvanized	37
GU4A10	10' Straight	36"	Aluminum	18
GU4A90__R30	90 Degree	-	Aluminum	14

Replace "\_\_" in Part Number with BF

When ordering for curve, specify inner radius & conveyor style

## Guard - Model GU5

### Construction:

**Rail:** 2-1/2" x 1" x 12 ga. galvanized steel channel. Set of 2 rails included.

**Attachment:** Adjustable vertically and horizontally, bolted to bottom of flange conveyor frame, hardware included.

Part Number	Conveyor	Channel	Wt. (Lbs.)
GU510	10' Straight	Galvanized	46
GU590__	90 Degree	Galvanized	38

Replace "\_\_" in Part Number with BF

**When ordering for curve, specify inner radius & conveyor style**  
**Guards for curves are adjustable vertically only**

## Dead Plate/Work Surface - Model DP

Dead Plates may be used as a stop or work surface. Dead Plates can be mounted into 2-1/2" and 3-1/2" frames at any location by simply removing existing rollers and bolting in place. The Dead Plate height will match standard roller height. Made of 12 ga. galvanized steel.

Part Number	BF	OAL	Capacity (Lbs.) (evenly distributed)	Wt. (Lbs.)
DP10BFX24	10"	23-7/8"	750	11
DP16BFX24	16"	23-7/8"	500	16
DP22BFX24	22"	23-7/8"	400	21
DP36BFX24	36"	23-7/8"	300	33

# ACCESSORIES

## Gate Kit - Model HG

Gates are used to create an opening through a gravity conveyor section. The spring assist mechanism reduces the lifting force required to open the gate. Each end of the opening must be supported by floor supports. Gates are available in Skatewheel or Roller conveyor. H-stands sold separately.

### Construction:

#### Frame:

**Skatewheel:** 2-1/2" x 1" x 12 ga. aluminum or galvanized steel channel.

**Roller:** 2-1/2" x 1" x 12 ga. galvanized or 3-1/2" x 1-3/8" x 11 ga. painted steel channel.

**Attachment:** Bolts to existing conveyors. All mounting hardware included; Field drilling may be required.

**Capacity:** Dependent upon conveyor used.

**Overall Width:** BF + 6"

### 3' SKATEWHEEL GATE KITS

Part Number	BF	OAW	Wheels Per Ft	Gate Frame	Wt. (Lbs.)
HG12x10x03A	10"	12"	10	2-1/2" Aluminum	37
HG18x16x03A	16"	18"	16	2-1/2" Aluminum	43
HG24x20x03A	22"	24"	20	2-1/2" Aluminum	49
HG12x10x03G	10"	12"	10	2-1/2" Galvanized	47
HG18x16x03G	16"	18"	16	2-1/2" Galvanized	58
HG24x20x03G	22"	24"	20	2-1/2" Galvanized	66

### 3' ROLLER GATE KITS

Part Number	BF	Roller	Roller Centers	Gate Frame	Wt. (Lbs.)
HG11F03EG15B10	10"	1-3/8" x 18 ga.	1-1/2"	2-1/2" Galvanized	59
HG11F03EG15B16	16"	1-3/8" x 18 ga.	1-1/2"	2-1/2" Galvanized	72

HG10F03KG03B22	22"	1.9" x 16 ga.	3"	3-1/2" Painted	103

## Hand Operated Roller Stop - Model RS140/RS190

The hand operated roller stop is used on gravity conveyors where manual line control is required to stop or index conveyed items.

To operate, rotate lever 90 degrees to raise or lower stop. It may be used as normally up or down

### Construction:

**Stop:** 1-3/8" x 16 galvanized steel roller with 7/16" hex shaft. Blade stop is optional. Also available with 1.9" x 16 ga. roller (RS140 is shown).

**Lock:** Positive over center style.

**Attachment:** Bolted to bottom flange of conveyor frame, mounting hardware included. Drilling of bottom flange required. During field installation, removal of one conveyor roller is required.

**Weight:** 15 Lbs. + (1 x BF)

Part Number	Roller	For Frame	Wt.
RS140B__	1-3/8" x 16 Ga Galvanized	2-1/2"	15 + (1 x BF)
RS190B__	1.9" x 16 Ga Galvanized	3-1/2"	15 + (1 x BF)

Replace "\_\_" in Part Number with BF

## Angle Stop - Model AS15

Used to stop conveyed items at a fixed location.

### Construction:

**Stop:** 1-1/2" x 1-1/2" x 3/16" painted steel angle.

**Attachment:** Bolted to top flange of 2-1/2", or 3-1/2" frame; mounting hardware included. Drilling of top flange required.

Part Number	Wt.
AS15B__	1 + (.15 x BF)

Replace "\_\_" in Part Number with BF

# ACCESSORIES

## Angle Stop - Model AS20

Used to stop conveyed items at a fixed location.

### Construction:

**Stop:** 2" x 2" x 1/4" painted steel angle.

**Attachment:** Bolted to top flange of 4" frame; mounting hardware included. Drilling of top flange required.

Part Number	Wt.
AS20B __	1 + (.27 x BF)

Replace "\_\_" in Part Number with BF

## Flat Stop - Model FS25

For use with 2.5" rail.

### Construction:

**Stop:** 3" x 3/16" painted steel

**Attachment:** Bolted to butt plate; mounting hardware included.

Part Number	Wt.
FS25B __	1 + (.16 x BF)

Replace "\_\_" in Part Number with BF

## Flat Stop - Model FS35

For use with 3.5" rail.

### Construction:

**Stop:** 3-1/2" x 3/16" painted steel

**Attachment:** Bolted to butt plate; mounting hardware included.

Part Number	Wt.
FS35B __	1 + (.19 x BF)

Replace "\_\_" in Part Number with BF

## Flat Stop - Model FS40

For use with 4.0" rail.

### Construction:

**Stop:** 4-1/2" x 1/4" painted steel

**Attachment:** Bolted to butt plate; mounting hardware included.

Part Number	Wt.
FS40B __	1.5 + (.32 x BF)

Replace "\_\_" in Part Number with BF

## Custom Solutions

Ashland Conveyor Products has over 45 years experience producing gravity and powered conveyors. We specialize in custom and standard products that provide material handling integrators and distributors an economical advantage. Markets and projects which we excel at are: major retail distribution centers, automotive assembly, warehousing, and parcel delivery.

Ashland Conveyor Products has the experience and products to complete your sortation system. Starting with spur sections off your sortation system, to herringbone

centering and down chute conveyors and finishing in centering and down chute conveyors and finishing in the trailer with our telescoping conveyor. Our engineering and full 3D Cad design capabilities enable us to custom design products for your application, providing you with the most cost effective solution.

This brochure provides you a limited example of our manufacturing and design capabilities. Please keep us in mind as a source for your gravity material handling projects.

We can apply our expertise in gravity systems to your project as seen in this foot operated escapement stop, or a counter balanced gate designed for a pallet handling operation.

Forklift interface for a 10,000 lb. pallet system.
